Q1). Pseudocode

```
1)  BEGIN
2)  DECLARE N, GrossTotal, Total, Discount, Nights : INTEGER
3)  DECLARE Season, RoomType                       : STRING
4)  GrossTotal ← 0
5)  INPUT N
6)  WHILE N<>0 DO
7)    INPUT RoomType
8)    INPUT Season
9)    INPUT Nights
10)   Total ← 0
11)   IF Season = "Peak Season" THEN
12)     Total ← (5000 * Nights)
13)     Discount ← Total * 0.15
14)     Total ← Total - Discount
11)   IF Season = "Peak Season" THEN
      IF RoomType = "Standard" THEN
12)     IF Nights > 7 THEN
13)       Total ← (5000 * Nights)
14)       Discount ← Total * 0.15
15)       Total ← Total - Discount
16)     ELSE
17)       Total ← (5000 * Nights)
18)     ENDIF
19)   ELSEIF RoomType = "Deluxe" THEN
20)       IF Nights > 7 THEN
21)         Total ← (8000 * Nights)
22)         Discount ← Total * 0.15
```
